LIFE SCIENCES

IN THE BRAZOS VALLEY

The Brazos Valley is the center of Texas's emerging biotechnology industry cluster. Our research, resources and facilities serve as your critical FDA pipeline to discover new therapies and technologies in plant, animal and human health. Companies perform preclinical evaluations and utilize flexible, scalable biopharmaceutical manufacturing, all in one convenient location. Our efforts range from initial research through pre-clinical and clinical testing, to pharmaceutical and medical device manufacturing and production.

LOCATION ADVANTAGE

THE TEXAS TRIANGLE HUB

PLANT

ANIMAL

HUMAN

The Brazos Valley is at the nexus of life sciences in Texas offering unprecedented industry opportunities to unite plant, animal and human health breakthroughs. The Brazos Valley leverages the unique expertise, research centers, institutes and agencies of The Texas A&M University System spanning agriculture, engineering, veterinary and public health.
